Search Engine Optimisation

SEO is the process of optimizing your website to rank higher on a search engine result page so that you receive more traffic.

Sweet Stuff

The Project

Improve Organic Traffic on the website

The Approach

We optimized the website by targeting high search volume keywords in both the metadata and content, while also ensuring the site was properly indexed by search engines and technical errors were resolved.

The Result

The website saw a **9.10% increase in organic traffic** and a **9% increase in new users.** Additionally, the website began ranking in the top 3 positions for generic keywords such as "chicken online in Mumbai," and achieved **page 1 rankings** for a set of **30 chosen keywords.**

Environmentality (Centre For Policy Research)

The Project

Optimize the website and **increase organic traffic specifically through mobile devices.**

The Approach

Our primary focus was on the **technical elements of the website, including addressing broken links, 404 pages, sitemaps, and other technical errors.** Additionally, we generated **backlinks to sustain our keyword positions.**

The Result

We successfully resolved all website errors to ensure mobile-friendliness, resulting in **70% of total organic traffic coming from mobile devices.**

What was the reason behind Delhi's air pollution?

Sourabh Sawant

Lives in Bengaluru, Karnataka, India (2013–present) · Feb 1

There are several reasons behind Delhi's air pollution, including the burning of crop residue, biomass, and municipal solid waste; emissions from vehicular traffic; and industrial emissions. In addition, the city's geography and weather conditions contribute to the problem, as Delhi is situated in a bowl-shaped topography and experiences inversion during the winter months, trapping pollutants in the air.

To know more about environment in India and understand what policies by the government have helped control it overtime, read more at our blog here.
